Re: Cross Brothers Site
Pembroke Township, Illinois

Dear Sir:

The U.S. Environmental Protection Agency (U.S. EPA) may expend public funds to investigate and take corrective action involving releases or threatened releases of hazardous substances, pollutants, and other contaminants from the above-referenced site. This action is authorized by the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, 42 U.S.C. § 9601 et seq. (CERCLA). Under CERCLA, responsible parties may be liable for money expended by the government to take necessary corrective action at the site, including investigation, planning, cleanup, and enforcement. Potentially responsible parties include the current owner or operator of the site, any past owner or operator, and persons who generated or were involved in transport, treatment, or disposal of hazardous substances at the site.

The release of hazardous substances at the Cross Brothers site has resulted in contamination of soil and groundwater with a variety of organic chemicals and metals. Several shallow private wells have been contaminated. Based on our review of Illinois Environmental Protection Agency files, U.S. EPA has information which indicates that you may be a party responsible for some or all of this release. Before the government undertakes the necessary action at the site, we offer you the opportunity to voluntarily perform the required work to abate any releases of hazardous substances, pollutants, or contaminants from the site.

U.S. EPA plans to initiate the following actions as the first step toward mitigating the release or threatened release of hazardous substances at the site:

A remedial investigation which will include soil sampling and quantifying the amount of buried wastes and contaminated soil.

A feasibility study which will include the screening of a limited number of remedial alternatives. Screening will include cost

08 DEC 1982

estimates with distribution over time, evaluation in terms of constructability, and impact on public health, welfare, and the environment relative to the other alternatives.

These measures constitute only the initial portion of the response actions which may be necessary at the Cross Brothers site.

As discussed above, you may be held responsible under Section 107 of CERCLA for all or part of the costs incurred by U.S. EPA in undertaking this work and other necessary remedial work. You have the option, should you decide to exercise it, of initiating these activities if this can be accomplished in a timely manner.

Within thirty days of the receipt of this letter, please notify in writing Mr. James Pankanin, On-Scene Coordinator, whether or not you intend to initiate the work being planned by U.S. EPA. Mr. Pankanin's address is U.S. Environmental Protection Agency, Region V, 111 West Jackson Boulevard, Chicago, Illinois 60604. If we do not receive a letter from you within thirty days, we will assume that you decline to undertake the response actions voluntarily.

If you wish to schedule a meeting with us to discuss the nature of the release or threatened release of hazardous substances, the steps to be taken to accomplish the response activities, as well as a time schedule for their completion, please call Mr. Pankanin at (312) 886-3009 within ten days of receipt of this letter.

Sincerely,

Basil G. Constantelos, Director
Waste Management Division

Several shallow private wells have been contaminated. Based on our review of Illinois Environmental Protection Agency files, U.S. EPA has information which indicates that you may be a party responsible for some or all of this release. Before the government undertakes the necessary action at the site, we offer you the opportunity to voluntarily perform the required work to abate any releases of hazardous substances, pollutants, or contaminants from the site.

U.S. EPA plans to initiate the following actions as the first step toward mitigating the release or threatened release of hazardous substances at the site:

A remedial investigation which will include soil sampling and quantifying the amount of buried wastes and contaminated soil.

A feasibility study which will include the screening of a limited number of remedial alternatives. Screening will include cost

estimates with distribution over time, evaluation in terms of constructability, and impact on public health, welfare, and the environment relative to the other alternatives.

These measures constitute only the initial portion of the response actions which may be necessary at the Cross Brothers site.

As discussed above, you may be held responsible under Section 107 of CERCLA for all or part of the costs incurred by U.S. EPA in undertaking this work and other necessary remedial work. You have the option, should you decide to exercise it, of initiating these activities if this can be accomplished in a timely manner.

Within thirty days of the receipt of this letter, please notify in writing Mr. James Pankanin, On-Scene Coordinator, whether or not you intend to initiate the work being planned by U.S. EPA. Mr. Pankanin's address is U.S. Environmental Protection Agency, Region V, 111 West Jackson Boulevard, Chicago, Illinois 60604. If we do not receive a letter from you within thirty days, we will assume that you decline to undertake the response actions voluntarily.

If you wish to schedule a meeting with us to discuss the nature of the release or threatened release of hazardous substances, the steps to be taken to accomplish the response activities, as well as a time schedule for their completion, please call Mr. Pankanin at (312) 886-3009 within ten days of receipt of this letter.

Sincerely,

Basil G. Constantelos, Director
Waste Management Division

Re: Cross Brothers Site
Pembroke Township, Illinois

Dear Sir:

The U.S. Environmental Protection Agency (U.S. EPA) may expend public funds to investigate and take corrective action involving releases or threatened releases of hazardous substances, pollutants, and other contaminants from the above-referenced site. This action is authorized by the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, 42 U.S.C. § 9601 et seq. (CERCLA). Under CERCLA, responsible parties may be liable for money expended by the government to take necessary corrective action at the site, including investigation, planning, cleanup, and enforcement. Potentially responsible parties include the current owner or operator of the site, any past owner or operator, and persons who generated or were involved in transport, treatment, or disposal of hazardous substances at the site.

The release of hazardous substances at the Cross Brothers site has resulted in contamination of soil and groundwater with a variety of organic chemicals and metals. Several shallow private wells have been contaminated. Based on our review of Illinois Environmental Protection Agency files, U.S. EPA has information which indicates that you may be a party responsible for some or all of this release. Before the government undertakes the necessary action at the site, we offer you the opportunity to voluntarily perform the required work to abate any releases of hazardous substances, pollutants, or contaminants from the site.

U.S. EPA plans to initiate the following actions as the first step toward mitigating the release or threatened release of hazardous substances at the site:

A remedial investigation which will include soil sampling and quantifying the amount of buried wastes and contaminated soil.

A feasibility study which will include the screening of a limited number of remedial alternatives. Screening will include cost

estimates with distribution over time, evaluation in terms of constructability, and impact on public health, welfare, and the environment relative to the other alternatives.

These measures constitute only the initial portion of the response actions which may be necessary at the Cross Brothers site.

As discussed above, you may be held responsible under Section 107 of CERCLA for all or part of the costs incurred by U.S. EPA in undertaking this work and other necessary remedial work. You have the option, should you decide to exercise it, of initiating these activities if this can be accomplished in a timely manner.

Within thirty days of the receipt of this letter, please notify in writing Mr. James Pankanin, On-Scene Coordinator, whether or not you intend to initiate the work being planned by U.S. EPA.
